

Rapid Monitoring System Development

Rapid Sensor Integration

Universal Sensor Interfaces from Cultinova enable plug-&-play connection of most types of sensor with Cultinova data management hardware and software, such as data-loggers, wireless hubs and web-based tools via any Internet connection. Furthermore, by connecting to our flat-panel controllers or stand alone control modules, sensors can also be used to control a range of valves, pumps, lighting controllers, heaters and coolers to realise fully integrated closed loop control systems.

- ✓ Quick & easy sensor integration
- ✓ Compatible with most types of sensor
- ✓ Wireless network or cable connection
- ✓ Cover distances of up-to 1km
- ✓ Connects to data-loggers, flat-panel controllers, wireless modems or PCs
